

OBEDA ALRAHAL

SOFTWARE ENGINEER | FLUTTER DEVELOPER

rhalobeda@gmail.com | Syria | Damascus | +993 997 561 410

PROFESSIONAL SUMMARY

Software Engineering graduate and Flutter Developer with hands-on experience in building and deploying responsive, cross-platform mobile applications using Flutter & Dart. Proficient in state management best practices (BLoC/Cubit, GetX) and routing (GoRouter), with strong expertise in backend integration (RESTful APIs, Firebase, Laravel) and clean, scalable architecture. Proven track record in delivering end-to-end features, including user authentication, quiz & assessment systems, study planning, content management, and role-based access control. Seeking a Junior Flutter Developer or Software Engineer position to contribute to real-world products and thrive within a collaborative development team

TECHNICAL SKILLS

Mobile Development

Flutter · Dart · BLoC / Cubit · GetX · GoRouter · Responsive UI · Reusable Components

Data & API Integration

REST APIs · Dio · Firebase · FCM / Push Notifications · Laravel Integration · JSON · SharedPreferences

Software Engineering

Clean Arch · OOP · State Management · Business Logic · Form Validation · Error Handling · Design Patterns

Development Tools & Practices

Git · GitHub · GitLab · Postman · Linux · Docker · Agile / Scrum · Sprint-Based Development

Programming Languages

Dart · Java · C++ · Prolog

SELECTED PROJECTS

NERD — Educational Learning & Assessment Platform

Flutter · Dart · BLoC/Cubit · REST API · Firebase · Laravel

- Developed a cross-platform educational platform integrating learning, assessment, study planning, performance tracking, and content sharing.
- Implemented complete authentication and onboarding flows, including email verification, password recovery, session management, access control, and account-state-based navigation.
- Built multiple assessment modes including MCQ quizzes, flashcards, and challenge mode, with timers, answer persistence, resume functionality, and detailed performance analysis.
- Designed a feature-based architecture with separate data, domain, and presentation layers, using reusable components and structured state management with BLoC/Cubit.
- Integrated the Flutter application with REST APIs and Laravel backend services, implemented validation and error handling, and deployed the application to a server environment.

JAMEATI — University Project Management & Academic Collaboration App

Flutter · Dart · GetX · REST API · Laravel · MySQL · Firebase FCM · Pusher

- Developed a complete Flutter mobile application as part of a 4-member team, taking full responsibility for the mobile application and its integration with backend services.
- Implemented core application features including project and group management, member and permission management, tasks, announcements, notifications, and in-app messaging.
- Integrated the application with Laravel REST APIs and MySQL-backed services, handling data retrieval, submission, loading states, and error handling.
- Implemented real-time messaging and updates using Pusher, along with Firebase Cloud Messaging (FCM) for push notifications.
- Used GetX for state management, navigation, and dependency injection, while developing responsive interfaces with Arabic/English and RTL/LTR support.

GOVERNMENT COMPLAINTS SYSTEM

Flutter · Dart · Laravel · REST API · Firebase · Layered Architecture

- Developed the Flutter mobile application for citizens as part of an integrated digital government complaints system, taking full responsibility for mobile application development and backend integration.
- Implemented core user flows including account registration, secure login, OTP verification, complaint submission with attachments, status tracking, and notifications.
- Built a comprehensive complaint tracking system supporting reference numbers, status updates, notes, complaint history, and progress tracking throughout the resolution process.
- Integrated the application with Laravel REST APIs, handling authentication, access control, data validation, loading states, and error handling.
- Addressed key non-functional requirements including security, traceability, usability, concurrency management, and scalability, while following a Layered Architecture approach.

EVENT MANAGEMENT SYSTEM

Flutter · Dart · Laravel · REST API · Localization · RTL/LTR

- Developed a multilingual Flutter mobile application supporting Arabic and English with full RTL/LTR layout support.
- Implemented core features including event reservations, favorites, personal settings, and user profile management.
- Integrated the application with a Laravel backend through REST APIs.
- Implemented gender-based avatar selection during account creation and designed responsive, user-friendly interfaces.

PHARMACY MANAGEMENT SYSTEM

Flutter · Dart · Laravel · REST API · Localization

- Developed a user-friendly Flutter mobile application for managing basic pharmacy workflows and medicine-related data.
- Implemented features for browsing medicines and managing basic pharmacy information.
- Integrated the Flutter application with a Laravel backend through REST APIs.
- Added Arabic and English language support to improve accessibility and usability.

EDUCATION

Damascus University — Damascus, Syria

B.Sc. in Information Engineering, Software Engineering
2021 – 2026

CERTIFICATIONS

- ICDL Certificate
- English Language Certificate — New Horizons Institute, Level 3B

LANGUAGES

- Arabic — Native
- English — Intermediate

ACTIVITIES & ACHIEVEMENTS

- LEGO Robotics Course — Robotics Club
- WRO Syria — Member, The Dextrones Team (RoboMission Senior)
